Instructions: Write your answers in a word document and email to will@accre.vanderbilt.edu before lecture (9:10am).

Choose two different network locations (e.g. campus, home, starbucks, tethered). For each network location collect:

a. Due Feb 4
   - What is the system’s local IP address?
     - Is it a private or public IP?
     - Is it behind a NAT from the perspective of the Internet?
       - curl ifconfig.co
   - What is another IP that would be on the same local subnet?

b. Due Feb 6
   - What DNS server(s) is/are being used?
   - Determine the IP address of an FQDN of your choice.
   - What is the route from the local system to the IP?
